DRIVE FAIR SHARE RULE

iRacing's "drive fair share" rule means that each driver must run at least 25% of an equal share of the event, rounded up to the next whole lap. As an example, here's how the math works out for a 67-lap event (which was the Crandon length):

- 2 drivers: $67 \text{ laps} / 2 = 33.5$ (34); 25% of 34 is 8.5; **each must run 9 laps**
- 3 drivers: $67 \text{ laps} / 3 = 22.6$ (23); 25% of 23 is 5.75; **each must run 6 laps**

ETIQUETTE

Do your part to keep this event fun for everyone. That means driving with respect for other drivers and event officials, and respecting that the damage off setting is designed to allow everyone to race for as long as possible, not to create a demolition derby. Drivers who choose to fly in the face of these expectations may be removed with or without warning at officials' discretion.

PROMOTIONAL CONCERNS

Each driver on the winning team in each class will receive \$1, plus additional non-cash prizes courtesy of Shenandoah Shine. The race will air live on [Racecraft TV](#).
